

Public 19 Reporting

COVID-19 Case Surveillance Public Use Data Utility Summary

Users should consider the level of completeness, including suppression levels when planning their analyses and use of public datasets. Privacy protections will suppress field values to reduce reidentification risks. Completeness varies by jurisdiction (i.e., state, local, and territorial) and time period. Variables are consistently coded to the value “Unknown” when jurisdictions specify in the case data submitted to CDC that the value is unknown, the value “Missing” when jurisdictions do not provide a value, and the value “NA” when the value is suppressed as part of privacy protections.

Dataset version: 11/2/2023

Quick Summary

	summary String	all_fields_counts Double	all_fields_pct Double	quasi_fields_co... Double	quasi_fields_pct Double
1	total_rows	101,766,479	NaN%	101,766,479	NaN%
2	total_columns	19	NaN%	8	NaN%
3	total_cells	1,933,563,101	100.0%	814,131,832	100.0%
4	suppressed_fields ...	55,507,086	2.9%	48,434,807	5.9%
5	missing_fields	445,121,121	23.0%	69,465,485	8.5%
6	unknown_fields	91,709,475	4.7%	45,851,632	5.6%
7	non_blank_fields	1,341,225,419	69.4%	650,379,908	79.9%
